

Allergic to Facts
Mike Delaney, 1/6/19

I was taught that two plus two is always four
It was true then and it's true forever more
If you say that two plus two is five
It doesn't make it true. It's just an uneducated lie.

You can't repeal gravity; it's a physical law
Don't think you can undo science; that would be a flaw
But today reality has come under attack
Because there are some, who are allergic to facts

Chorus:

Don't be allergic to facts
Facts don't need proof
Get vaccinated with justice
Inoculated with truth
Don't be allergic to facts

They say, "truth is not truth" and "alternative facts"
But repeatedly tweeting doesn't turn white into black
What is the latency period for evils and ills?
Until it becomes malignant, spreads, and kills

What side-effects are also unleashed?
What medication can spread an epidemic of peace?
Can we get a generic prescription?
For these communicable mistruth afflictions

Chorus

Bridge:

You don't perform an autopsy until the patient dies
But even in intensive care you can irradiate the lies
Or give megadoses of truth-chemo to kill the malignant cancer
It seems that modern medicine should be able to find an answer

Chorus x2
